### COMPANY DESCRIPTION

**Weber and Tinnen, P.A. is a Structural Engineering Consulting Firm** providing reliable and skilled design and contract administration services to architects, engineers, owners, contractors and developers.

#### **Types of Experience —**

Our staff is experienced in projects utilizing all commonly used structural materials including plain and reinforced concrete, plain and reinforced masonry, structural steel, structural timber and composite uses of two or more materials.

We also have experience in the design of specialized systems, such as Filigree, Tilt Up, Post-Tensioned concrete, etc.

The goal of the firm is to provide common sense solutions to problems and to present the solutions in a clear concise manner. From initial meeting with the client to the final implementation of the contract documents, constant staff/client contact is maintained. The principals are always accessible to clients whether for a five-minute telephone consultation or a contract extending several years.

#### **Professional Staffing —**

Weber and Tinnen, P. A. is sufficiently staffed to provide the necessary professional services. Our staff includes three Professional Engineers, one construction consultant, one construction monitor and two CADD Designers plus supporting administrative staff.

#### **Past Performance —**

Weber and Tinnen, P. A. has an established reputation for providing high quality services, accurately, and on time. Our staff works diligently to provide the highest quality documents and services available. Each project is assigned to a project manager who is responsible for scheduling the different phases of the project.

A quality control team is assigned to review the documents generated during each phase. Prior to submission of the final documents, each design or report will be reviewed for both quality and accuracy. All of our construction documents are prepared using IBM compatible computers. Word processing is completed on Microsoft Word and construction drawings completed on AutoCAD Version 2010, transitioning to Revit Structure. Printing is performed on laser printers and plotting is performed on a Hewlett Packard Ink Jet Plotter or an Océ' laser plotter.

#### **Meeting Project Schedules —**

Meeting the project schedules of the client is paramount at Weber and Tinnen. Prior to beginning work, the project manager will establish a project schedule with the client for each phase of the project. Each month the project manager will review that schedule with the client and describe the work performed to date.
