PROJECT EXPERIENCE

Mr. Weber had 10 years of architectural drafting experience prior to joining a Structural Engineering firm. In 1983 he co-founded Weber and Tinnen, P.A. in St. Petersburg, Florida and remains an active principal in the firm today. As a structural engineer, he has been responsible for the design of low, mid and high-rise buildings constructed with structural steel, reinforced concrete, reinforced masonry and structural timber. As a member of the design team of Weber and Tinnen, P.A., Mr. Weber has participated in the design of (and/or has been the Structural Engineer of Record for) numerous projects in Florida. His involvement has included planning, structural analysis, structural design, preparation of structural construction documents, construction phase services, and serving as Special Inspector.
